## HOSPITAL OPENS NEW CT CENTER IN SUNRISE

North Shore Medical Center FMC Campus celebrated the opening of the new Imaging Center of West Broward in Sunrise.

The center will be led by Dr. Ivan L. Ayala, clinical director of cardiac imaging, and a team of physicians and technologists. With advanced technology, the CT system can capture images of the body's most complicated parts – including the brain and heart – which helps with diagnosis of conditions at an early stage.

Ayala is board certified in cardiology and cardiovascular computed tomography and earned level III recognition from the Society of Cardiovascular Computed Tomography.
